

Whitepaper

Envanik DAO

Blockchain solutions that build value

OBJECTIVES

envanik - EVX is a Utility based DeFi project. We provide a variety of crypto business services and solutions in our ecosystem. We are building utilities such as; Crypto marketplace, Nft marketplace, Play to Earn games, wallet and crypto loans. The reason for developing this business is justified by filling a gap in the DeFi market regarding the growing demand for quality products and services that are essential for the DeFi market.

PRODUCTS PROVIDED BY ENVANIK

The Marketplace

Sesaia, Sesaia.com is our first product developed by Envanik to facilitate a marketplace for crypto and Blockchain products and services.

This is a general marketplace where all crypto projects can open account and list their products and services, for free and payments are in Envanik and other selected crypto currencies.

The fees to be charged will only happen once a product has been sold, 50% of all these fees shall be used to purchase Envanik from the market and burn,

Thus this will help keep the value of the Envanik token stable for long times and profitable for the holders.

Envanik NFT market

The Envanik NFT marketplace is under development, this will facilitate the nft collectors with a place to trade their nft collections I our ecosystem.

Of course 50% from the fees collected after sales of NFT products shall used to buy back Envanik from open market and send to the burn address.

Keeping the value of the token desirable to investors, holders and the ecosystem thriving.

Custom price bot for telegram

Providing price bot and token information display in group.

Envanik wallet

The Envanik wallet shall come with all crypto features and integrations that will make it desirable for the crypto community.

The inbuilt dex, secure browser and integrations with pancakeswap and uniswap and Envanik products.

Envanik crypto lending

The Envanik crypto lending platform is to help our holders and investors in times of price crashes or down ward trend, with minimal interest rates,

They can access the funds without selling their holds for long periods and as the prices become desirable, they can then get to access their envanik tokens.

Envanik P2E

The envanik p2E is a play to earn feature, this will come with a variety of games where players will earn the envanik tokens.

We shall also go for patternships with different P2E organizations to increase the number of the games

Payment gateway

Payment intermediation system in DeFi, envanik shall build its own payment gateway and system; this will help make the transactions seamless.

Envanik LAUNCH

The idealization of the project began in the first quota of 2021. The disclosure of the private sale took place on December 116th.

Since its creation, several measures have been taken, such as the creation of the company's headquarters and the transmission studio,

The organization of the responsible team and also the structuring of computers and equipment to enable the work and the AMA's

TOKENOMICS

Token distribution

- ✓ 20 million supply
- ✓ 10% for the private sale
